W.H.REYNOLDS (Cambridge) Ltd. is a manufacturer of high quality indoor and outdoor bleacher seating. Bleachers of any size can be specifically engineered and manufactured to meet your requirements, be it for a community park or a stadium.

Our bleacher manufacturing plant is located in Cambridge Ontario, the heart of southern Ontario, enabling us to provide the needs of central Canada as well as having easy access to both Eastern and Western Canada. Our "Bleacher/Grandstand Systems" are manufactured in accordance with the Canadian Welding Bureau and CAN/CSA 16.1-94. Bleacher versatility is our expertise and we can build a solution to suit any application, be it stadium, grandstand or bleacher.

Our bleachers can be complimented with Players' Benches, available in any length and can be manufactured with or without backrests. All aluminum construction and all post supports are Hot Dip Galvanized after fabrication. Stairs and Ramps can also be installed on your bleacher system to allow easy access for everyone.

W.H.REYNOLDS (Cambridge) Ltd. is committed to maintaining the highest standards in bleacher design and manufacturing the finest quality seating. Our bleacher seating applications can be used in outdoor and indoor facilities such as schools, arenas, pools and sports fields. We have bleacher installations in major centers across Canada. We look forward to assisting you in the early stages of your project with free consultation, specifications, cost estimation and samples. With years of bleacher manufacturing experience, we can respond to your seating needs. Bleacher specifications may vary according to site details. Please call our office for exact application requirements: 1-888-653-9721.

BLEACHERS

Dimensions and Capacity

W.H. Reynolds modular bleacher systems are designed for installation based on the space available and the seating required. Our bleacher frames come in 3,4,5,10,15 and 20 tier design. They are available in various lengths and can be installed on elevated superstructures, as more seating is required.

This allows for construction of multi-tiered bleacher systems that make maximum use of the space available and are built to meet and exceed all Canadian Building Code requirements.

All steel understructure is hot dip galvanized after fabrication. Stairs and ramps can also be installed on your bleacher system to allow easy access for everyone. Custom seating can also be created for all stadiums with concrete superstructures.

BLEACHER MODEL	CAPACITY	DIMENSIONS
		Height - Depth - Length
3R6AP(2) - 3 Rows x 6 ft. Aluminum	12 seats	33" x 58" x 6'
